

Risk statement:

Margin trading can make huge gains, but it is also accompanied by huge risks that are not suitable for all investors. Before deciding to trade forex, you should carefully consider your investment objectives, experience levels and risk preferences. Past performance is not indicative of future results, as it will vary with market volatility. It may be that you will lose some or all of your initial investment, so you should not invest your undiminished capital. You should be aware of all the risks associated with forex trading, and if you have any questions, seek advice from an independent financial adviser.
